Email: padamyaswanth@gmail.com
Mobile: +91-9032564677

Skills

- **Languages**: C++, JavaScript, Python
- **Frameworks/Libraries**: scikit-learn, React.js, FastAPI, Node.js
- **Tools/Platforms**: Git, Docker, AWS
- **Databases**: SQL, MySQL, MongoDB
- **Core Concepts**: Data Structures and Algorithms, object-oriented design, DBMS, Computer Networks, Operating System, Complexity analysis, Generative AI
- **Soft Skills**: Adaptability, Time Management, Problem-Solving

Projects

UniGuard AI – Multi-Agent RAG Compliance Platform: Apr 2026 – May 2026

- Developed a multi-agent RAG platform for analyzing university policy documents and generating role-aware, compliance-focused responses.
- Engineered a 5-agent workflow covering query normalization, intent classification, semantic retrieval, risk assessment, and persona-based response generation.
- Integrated 3 key components—Pinecone vector search, Groq (Llama 3 8B), and FastAPI microservices—to enable real-time policy retrieval and question answering.
- Containerized microservices using Docker Compose, deploying the application on AWS.
- Tech Stack: Python, FastAPI, React, REST APIs, Docker, Jenkins, AWS, Pinecone, ChromaDB, MySQL, JWT, RAG, Groq, Microservices

RFQ British Auction System – Logistics Procurement Platform: Mar 2026 – Apr 2026

- Designed a microservices-based reverse auction platform enabling logistics providers to compete through real-time downward bidding for freight RFQs.
- Implemented JWT-based authentication and authorization to secure access and prevent unauthorized bidding.
- Developed 3 auction mechanisms—dynamic auction extensions, L1/L2/L3 bid ranking, and forced-close workflows—to support competitive procurement.
- Containerized MERN-stack services with Docker and MongoDB, supporting RFQ management, document sharing, notifications, and audit tracking.
- Tech Stack: MongoDB, Express.js, React, Node.js, Docker, JWT, REST APIs, Socket.IO, Redis

Training

Mindforge Jun 2025 – Jul 2025

Applied AI Engineering

- Gained hands-on experience in Machine Learning, Deep Learning, NLP, and Generative AI, covering LLMs, Transformers, tokenization, attention, prompt engineering, embeddings, and vector databases.
- Worked with RAG, fine-tuning, structured outputs, tool calling, and Agentic AI, including multi-agent systems and frameworks such as LangChain and Hugging Face.
- Developed GenAI backend workflows using FastAPI and REST APIs, integrating LLMs and vector databases with asynchronous inference, authentication, and deployment workflows.

Certificates

- MySQL HeatWave Implementation Certified Associate Rel 1 - Oracle — Mar 2026
- C++ Programming Certifications – Neo Colab — May 2025
- Privacy and Security in Online Social Media – NPTEL — Oct 2025
- Full Stack Developer – GeeksforGeeks — Mar 2025

Achievements

- 365-Day Leetcode Badge: — Oct 2026
  Maintained a 365-day LeetCode streak, solving 500+ problems through consistent daily practice.
- Hackverse 2024 – Top 5 Finalist : — Nov 2024
  Achieved Top 5 through rapid prototyping, teamwork, and innovation under time constraints.

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.88*** — *Aug 2023 – Expected 2027*
- **Aditya Junior College** — Sri Nagar, Kakinada
  Intermediate; ***Percentage: 96.7*** — *Apr 2021 - Mar 2023*
- **Sri Chaitanya Techno School** — Laxmi Nagar, Kakinada
  Matriculation; ***Percentage: 98.3*** — *Apr 2020 - Mar 2021*
