SKILLS

- **Languages**: C++, JavaScript, Python
- **Frameworks/Libraries**: scikit-learn, FastAPI , React.js , Node.js
- **Web Technologies**: HTML, CSS
- **Tools/Platforms**: VS Code, Git, Maven, Docker, Jenkins
- **Databases**: MySQL, MongoDB
- **Soft Skills**: Adaptability, Time Management, Problem-Solving

PROJECTS

UniGuard AI – Multi-Agent RAG Compliance Platform: Github Apr 2026 – May 2026

- Architected a multi-agent RAG platform that analyzes university policy documents and delivers role-aware, compliance-focused responses with reduced AI hallucinations.
- Engineered a 5-agent workflow for query normalization, intent classification, semantic retrieval, risk assessment, and persona-based response generation.
- Integrated Pinecone vector search, Groq Cloud (Llama 3 8B), and FastAPI microservices to enable accurate policy retrieval and real-time question answering.
- Automated CI/CD pipelines with Jenkins and containerized services using Docker Compose, ensuring scalable, reliable, and streamlined deployments.
- Tech Stack: Python, FastAPI, React, Docker, Docker Compose, Jenkins, Pinecone, ChromaDB, SQLite, JWT, RAG, Groq (Llama 3), Microservices**.**

AI Job Recommendation System : Github Apr 2026 – May 2026

- Created a microservices-based job recommendation platform that analyzes uploaded resumes, matches candidates with relevant job roles, and provides AI-powered career recommendations.
- Optimized resume preprocessing using NLTK, reducing irrelevant tokens by 40–60**%** through lowercasing, punctuation removal, and stopword filtering to improve matching accuracy
- Implemented TF-IDF and cosine similarity-based ranking, increasing specialized skill detection by 2–5× while ensuring 100% length-agnostic resume-job matching and accurate job ranking.
- Accelerated recommendation delivery by 30–50% using Grok 3 API over Gemini API, while leveraging NumPy-based vector caching and FastAPI services to provide real-time job application links and recommendations.
- Tech Stack: Python, FastAPI, React, MongoDB, TF-IDF, NLTK, Docker, Grok API , Microservices.

Carbon Footprint Optimization in Iot Device Usage using Machine Learning : Live Mar 2026 – Apr 2026

- Designed a machine learning system for energy consumption forecasting and IoT device behavior analysis.
- Leveraged XGBoost regression to predict energy usage, delivering a 20% improvement over baseline models**.**
- Utilized KMeans clustering to segment IoT devices based on usage patterns, uncovering high-consumption clusters and optimization opportunities.
- Engineered an end-to-end ML pipeline with preprocessing, feature scaling, clustering, and model tuning, enhancing prediction stability and reducing variance by **15%** deployed via FastAPI.
- Tech Stack : Python, NumPy, XGBoost, Kmeans scikit-learn, Pandas, Matplotlib, Seaborn, Fastapi.

TRAINING

Cipher Schools (Edtech Company) Jun 2025 – Jul 2025

A Guide to Machine Learning with Data Science | Certificate

- Learned the complete Machine Learning and Data Science lifecycle, including data preprocessing, EDA, feature engineering, model training, evaluation, and deployment workflows.
- Gained hands-on experience with supervised (Linear Regression, Logistic Regression, KNN, SVM, Decision Trees), unsupervised (K-Means, PCA), and deep learning models (CNN, RNN, LSTM).
- Completed hands-on projects including Carbon Footprint Optimization in IoT Device Usage, Waste Segregation System, and Text Classification using SVM and TF-IDF for NLP applications.

CERTIFICATES

- Privacy and Security in Online Social Media – NPTEL Certificate Nov 2025
- C++, Java Programming Certifications – Neo Colab Certificate May 2025
- Full Stack Developer – GeeksforGeeks Certificate Aug 2024
- Programming in Python – GeeksforGeeks Certificate Dec 2023

ACHIEVEMENTS

- 200 Days Badge Leetcode : Dec 2025
  Received a 200-day LeetCode streak, completing 400+ problems with consistent daily practice.
- Hackverse 2024 – Top 5 Finalist **:** Nov 2024
  Achieved Top 5 ranking by designing and implementing a functional solution under time constraints, showcasing teamwork, innovation, and rapid prototyping.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.86*** *Aug 2023 - Present*
- **Aditya Junior College** Sri Nagar, Kakinada
  Intermediate; ***Percentage: 96.7*** *Apr 2021 - Mar 2023*
- **Sri Chaitanya Techno School** Laxmi Nagar, Kakinada
  Matriculation; ***Percentage: 98.3*** *Apr 2020 - Mar 2021*
